CD NO. 25X1A

COUNTRY East Germany

DATE DISTR. 6 October 1953

SUBJECT Information on USIG, Berlin-Weissensee,
Berliner Allee 107-110

NO. OF PAGES 1

25X1A

NO. OF ENCLS.
(LISTED BELOW)SUPPLEMENT TO
REPORT NO.

25X1X

1. The chief physician of the Russian clinic at USIG is a female doctor, whose name is not known. The chief dentist, also unidentified, is a German.
2. VEB Injecta, formerly an SAG enterprise, occupies four stories in the central portion of the Askania Haus on the Liebermann Strasse side. The Injecta building goes through from Liebermann Strasse to the USIG courtyard, but is cut off from the main USIG offices and from the German offices on the far end of the building by solid walls. The Injecta plant cannot be entered from either the Russian or the German part of USIG. The only entrance is from the courtyard through a separate entrance. Special passes are needed to enter the Injecta building. The present staff consists of approximately 400 persons. Injecta is believed to produce medical instruments.
